

BLACK BULL impact protection bollard, for setting in concrete, Height 1,200(+400) mm, plastic-coated, XXL version, diameter 273, yellow-black

The **BLACK BULL impact protection bollard** is an extremely resilient bollard made of quality steel.

Effectively prevents collision damage, secures inventory, traffic routes and work areas.

The impact protection bollards protect machines, pillars, supports, columns, shelves, (roller) doors, loading ramps, etc.

For medium to heavy loads. Recommended where space is limited.

Properties
